

WOOD WATTLES

Erosion Control Logs

GreenSolutions™ Wood Wattles are made of rough-cut wood mulch encapsulated in a resilient tubular sock. They are simple to install and may be deployed and ready for immediate use in no time. Compost wood wattles are not attractive to livestock and wildlife, and do not attract rodents and birds like traditional straw wattles. The high strength netting does not allow for the entanglement of reptiles and amphibians in sensitive Riparian Zones. **Green Solutions™ Wood Wattles** are heavy and perfect for use as a replacement for silt fence, especially in rocky areas. They are also an economical alternative to expensive and laborious rock check dams, and may also be used for inlet protection.

Sizes	Sections
8" x 200'	4 / 50'
12" x 100'	4 / 25'
18" x 55'	
24" x 30'	

*CUSTOM SIZES AVAILABLE | *EACH PALLET HAS STAKES INCLUDED | +/- 24 PALLET PER TL
