TENSAR GEOGRID CASE STUDY

Project: Terminal 7 @ Barbours Cut

Location: Houston, TX

Installation Date: Fall 2002

Owner: Port of Houston

Contractor: McCarthy Construction

Engineer: Infrastructure Associates

Product: Tensar BX 1100

Quantity: 60,000 SY

Application: Subgrade Improvement

Project Notes:

A single layer of Tensar BX1100 was used in place of a high strength geotextile fabric to establish a more competent base beneath 12" of recycled concrete.
